Abstract. This article shows women’s purposes, dreams, intentions toward life, although they have got barriers in the society. Also, women rights, their positions in real life and main improvements will be mentioned in this article.

Key words: Women, feminism, woman right, improvement, achievement, society, obstacles with their solution.

“You educate a man; you educate a man.
You educate a woman; you educate a generation.”

Brigham Young.

INTRODUCTION

As we all know, in today’s society, women face discrimination and gender inequality in order to play an important role in their lives. The statistics show them as having undervalued rates for finding their path in real life. As a result, they are struggling to be more than a simple daughter or mother. Because the government and the rest of the world have been working with them to address these issues and eliminate gender inequality in the modern world. Indeed, it is such a disgusting thing if they are not able to speak or to express their feelings and intentions toward life and society. The modern world provides every opportunity for people to become politicians, socialists, or economists. Do you know why the world pays attention to feminism? Because, as stated in the sample quote above, "if the man is educated, the world only gains from men." If it acts in the opposite direction, the world benefits for generations to come.

That is the true sentence that Brigham Young mentioned. As a consequence, the universe will strive in every field of life.

OBSTACLES THAT THE WOMEN ARE SUFFERING, AND SOLUTION FOR THEM

1. Access to education

The main issue is the inaccessibility of education. In this way, people consider that education is only for men. Because men are regarded as more important than women. Take, for example, when it comes to their narrative outlook: If they educate men, they will not have any problems providing for their families in the future. If it compares to women, they think they cannot do it or are not worth being educated. It is not justice for them. Also, they do not know that educated women can be able to bring up healthy and well-mannered children or deliver well-educated offspring to the world via their knowledge. That’s why the government should implement more opportunities for girls, like giving them a chance to be enlightened in their lives.

2. Gender – based violence

The vast majority of people, particularly men, regard women as servants or simple mothers. Unfortunately, they are also staying with domestic chores while men work in luxury offices and convenient departments without concern. What is an offensive treatment for them? They are also qualified to work as qualified teachers, doctors, and other professionals, as well as to own businesses. As a result, members of the country and the government should create opportunities, such as business clubs, sport clubs, and other useful clubs related to their desires, in order to improve women’s position in the modern world.

IMPROVEMENTS AND ACHIEVEMENTS IN FEMINISM

The world is moving "forward" with more improvements and implementations on the women’s side. North means that you go toward the upper side of the universe. The most appealing feature in this part is that women could have been educated for five years. Even so, they are acquiring a wide range of knowledge. Such as IT, engineering, management, and programming. Furthermore, they have been outstanding people in

political circles. For example, Priyanka Chopra, who is well-known as an actress, singer, and UNICEF worker, is followed by Emma Watson, who is also well-known for her acting abilities and work with UNICEF. That, I believe, is the exemplifier from which we can draw the correct conclusion. Furthermore, as these opportunities have been created for us (women), if I compare these accomplishments to my home country, Uzbekistan, we have made more strides in feminism. Before talking about progress in Uzbekistan, I want to mention our president’s sentences.

“I’m looking for woman for the position of district “khokim”, but I can’t find any. They should be given an opportunity to prove their worth. We should strengthen their role. Whether you like it or not. I approve it.

Why? I want to reiterate that our women can set an example for everyone with their deep understanding of problems, dedication, a sense of responsibility and diligence.” Said Shavkat Mirziyoyev Miromonovich.

Indeed, in Uzbekistan, feminism is controlled by our president. He is paying attention to women’s role in modern society. All of these things are noteworthy, including those implemented by Sh. Mirziyoyev.

a) Extra grants for girls.

If you are a master’s degree student, you are able to study free of charge. The main purpose of it is to enhance women’s education in Uzbekistan. And to deliver well-educated and well-mannered girls in life. Because, as you know, our generation’s fate is in the hands of our women.

b) Extra scholarships for girls

The scholarship’s purpose is to pique the girls’ interest in education. It is called "Zulfiya lady." This scholarship specialized in many fields. It assesses your knowledge and provides you with the opportunity to win a highly valued scholarship. For example, if you specialize in sports, you must compete with your competitors to win this prize.

c) Extra payments after having a baby.

This is the outstanding achievement that should be highlighted in this topic. Because it provides mothers with money until a baby goes to kindergarten. Our

government subsidizes mothers like these in order to remove barriers that may arise during the maternal period. Furthermore, the goal stated that mothers should be returned to society as soon as possible.

On the one hand, men have begun to look up to women in all fields of endeavor. Whether it is a “khokim”, politician, doctor, mother, or even a police officer, They are the most memorable advances in women’s society.

CONCLUSION

To summarize, feminism has positively influenced the world and provided opportunities for gender equality. Despite the fact that they face numerous challenges in modern society, they are attempting to address all issues. In addition, they are gaining more achievements and conveniences from government bodies and men. Finally, they are finding their position gradually in the society.
