ABSTRACT

Nowadays there are so many languages in the world, place of the English language occupies an unequal place in the world. I see English as the most global language after my own personal thoughts and a lot of research. we can see that today English is one of the leading languages in the world, it has its own place in each country and it should be noted that it has become the main language for children in schools and they also teach English in kindergartens

Keywords: English speakers, global language, speaking English , employees,

INTRODUCTION

A global language is one that is spoken and understood at an international level by a wide variety of people. Moreover, no language in the world better fits this description than the English language. When it comes to languages, one can make a strong argument that a strong link exists between dominance and cultural power. Furthermore, the main factor that the languages become popular is due to a powerful power-base, whether economic or political or military. The derivation of the English language took place from languages like French, Latin, German, and other European languages. This can be a reason why many Europeans don't find English a difficult language to learn. Furthermore, linguists argue whether the simplicity of the English language is the main reason for it becoming a global language. The Latin script of the English language appears less complicated for people to recognize and learn. Also, the pronunciation of the English language is not as complex as other languages like Korean or Turkish for example. Generally, the difficulty level of a language varies from person to person and it also depends on the culture to which one may belong. For example, a Korean person would find less difficulty in mastering the Japanese language in comparison to a German person. This is because of the close proximity of the Korean and Japanese cultures.

MATERIAL AND METHOD

Due to the massive British colonial conquests, no culture is in complete oblivion of the English language or words. As such, English is a language that should not appear as too alien or strange to any community. Consequently, learning English is not such

big of a deal for most people as they can find a certain level of familiarity with the language. People often talk about English as a global language or lingua franca. Therefore, the form of a word group may not differ from the second word group when it comes to its initial form or the first form of its paradigm. For example, if we take the words water, telephone, measure, mistake, they are both nouns and verbs at the same time, that is, water - water, to put water, to irrigate; telephone, to make a telephone call; measure - «measure, measure; mistake error; can come in the sense of making a mistake. Such cases are relative between horse and quality 1) relative; 2) related, relative; wet between adjective and verb 1) wet; 2) soaking, moistening; one between a horse and a stalk 1) a; something is an object, the person also encounters it regularly. Some are made in the presence of conversion, some are made as a result of the loss of flexion, and the amount of such common words that are compatible in terms of form is very large. It is the language of business, technology, sport, and aviation. This will no doubt continue, although the proposition that all other languages will die out is absurd. Another key aspect is that there are a lot of English-speaking countries and it is easy for us to learn the language in the process of communication, and we also have free courses to teach different English on different telegram social networks. In such online courses, as well as in the use of the social network YouTube, there are a number of opportunities for us to speak English fluently through various videos. I can say that all this is the reason for the globalization of the English language. This language is also included in the list of languages that are easier to learn compared to other countries in the world. We know that this is the language spoken in the global linguistic world and in many counties.

CONCLUSION

As we all see, I have explained in my own thoughts that language is global. A person should not get tired of moving as long as he is alive. I was able to give a basic accent to the English language based on my own experiences. For us to speak real English, the environment plays a biggest role, and at the same time, the global level also plays a biggest role. Dear friends, at the end of our speech, I recommend you to search for sources and information that are growing globally in life, and I think I was able to help you with this statement.
