Foreign Language and Literature, 4th year, student of group 20.117C.

ABSTRACT

This article is written to show a bright way to teachers for becoming lovely teacher in classroom and this article helps instructors to manage their lessons effectively.

Keywords: Bachelor's degree, methods, profession, colleague, friendly, strict, hero, lie, voice tone, theme, technologists, motivation, learner.

Nowadays, becoming a teacher is easy, because you can be a teacher, if you have good knowledge and Bachelor's degree. However, it is taught to be the best teacher and manage lessons beautifully. Now I will explain some methods to make difficulties in teaching easy.

1 Love your job.

Firstly, teachers should enjoy teaching pupils. If they love their job, it helps them to do their best in this profession despite all difficulties. So, instructors can get amazement instead of losing their energy while working.

2 Live and learn.

Secondly, teachers should not stop from learning, although they are better than their colleague. The reason behind is this that their pupils are growing their knowledge in every minute and one day pupils may be have similar level with teachers. At that time teachers are not able to teach pupils with pupils' wanted way. So, teachers should always learn new knowledge related to their subject by heart in order to pretend themselves to be in similar skill with their students.

3 Friendly face can win strict one.

Some teachers think that becoming strict is the best way to be the best teacher. However, I think a better way forward would be to be friendly with learners, since, becoming friendly helps students to ask their unknown rules in their subject. Also, learners can give their own ideas about the theme. When pupils have their own ideas about theme and learners understand rules correctly, teacher can be a good teacher.

4 Separating pupils makes teacher bad.

Unfortunately, there are some teachers who think that only either clever or wealth pupil can achieve success in life, but, it is the biggest

mistake to teach pupils with sorting out wealth and learning. Because, there are a lot of people who can be master in knowledge with extraordinary intelligent in old ages or poor families. So, teachers should pay similar attention for every pupil despite their degree in a life.

5 Teacher is a hero.

Teachers and parents are the best heroes in the world for pupils. Learners learn every bad and good things from teachers. So, teachers should have the best manners, and, teachers should pay attention to their small bad habits. For example, one day one of my student promised me to do homework in next lesson, but, he did not do his homework.

I said "Lying is a bad habit. If you used to do bad habit, you cannot be the best person". Suddenly, my clever pupil said "Isn't our teacher the best person?". I said "No, he is the best person".

My pupil said: "Why does he always lie us with saying promises as next lesson I will give something if you study hard, and, he never does his promises.".

After that situation, I understand that pupils copy every habit from us, and, I told that situation to my colleague, also, we solved that problem. Dear teachers, be careful in your every step, because our future leaders learn every actions from teachers.

6 Changing voice tone opens the door to pupils' heart.

Similar things make people bored. Similar tone is not an exhibition, because, if teacher uses unchangeable voice during the lesson, pupils are bored to death and lose concentration despite teacher's important theme. Boring lesson make both lesson and teacher bad.

7 New technologies are best helper for teachers.

Now technologies dominate the world and using new technologies in a lesson is the best way to attract pupils easily to our lessons. For example, if teacher uses new white electronic board, he can attract more pupils than attracted pupils with usual black boards.

8 Motivations changes learners.

Every person needs motivation, because, motivation helps us to make difficult task easy. If pupils has a motivator teacher, learners can achieve success easily. For example, if teachers motivate their best learners with giving gifts monthly, they may get better results month by month.

These methods will be helpful for every teacher who wants to be the best teacher. In my opinion, the best teachers should have my mentioned skills at least.
